Hyun Go 고현

PhD Student, Department of Architectural Engineering
University of Seoul, 163 Seoulsiripdae-ro, Dongdaemun-gu, Seoul 02504, Republic of Korea

gohyun2000@uos.ac.kr · ORCID 0009-0007-0160-7882 · gohyun2000.github.io

RESEARCH INTERESTS

Seismic performance evaluation of steel structures · Nonlinear dynamic and incremental dynamic analysis · Seismic loss assessment · Pipeline-supporting structures (pipe racks) · Steel concentrically braced frames · Gusset-plate connections

EDUCATION

2025.03 – **PhD in Architectural Engineering**
University of Seoul — Advisor: Prof. Hyung-Joon Kim

2023 – 2025 **MS in Engineering, Architectural Engineering**
University of Seoul — Advisor: Prof. Hyung-Joon Kim
Thesis: *Seismic Risk of Pipeline Supporting CBFs Designed According to Different Seismic Design Requirements*

2019 – 2023 **BS in Engineering, Architectural Engineering**
University of Seoul

JOURNAL ARTICLES

2026 **Go, H.**, & Kim, H.-J. *An equivalent single-degree-of-freedom model for estimating the seismic fragility of pipe-rack steel concentrically braced frames.* Journal of the Computational Structural Engineering Institute of Korea. (in Korean)

2025 **Go, H.**, & Kim, H.-J. *Seismic risk evaluation of pipeline supporting chevron steel concentrically braced frames designed according to general steel design requirements.* Engineering Structures, 343, 121200. doi:10.1016/j.engstruct.2025.121200

2024 **Go, H.**, & Kim, H.-J. *Probabilistic seismic performance of pipeline supporting CBFs according to seismic design parameters and requirements.* Journal of Korean Society of Steel Construction, 36(4), 229–241. doi:10.7781/kjoss.2024.36.4.229 (in Korean)

2023 Shin, Y.-S., **Go, H.**, & Kim, H.-J. *Simplified FEA model for non-seismically detailed gusset plates welded to a column web only.* Journal of Korean Society of Steel Construction, 35(6), 303–314. doi:10.7781/kjoss.2023.35.6.303 (in Korean)

2023 Shin, Y.-S., **Go, H.**, & Kim, H.-J. *Compression buckling behavior and stress distribution of non-seismically detailed gusset plates welded to a column.* Journal of the Architectural Institute of Korea, 39(6), 235–243. doi:10.5659/JAIK.2023.39.6.235 (in Korean)

CONFERENCE PRESENTATIONS

International

2025.11 *Collapse capacity and pipeline leakage of pipeline-supporting chevron CBFs designed with general provisions.* 13th International Symposium on Steel Structures & 14th Pacific Structural Steel Conference (ISSS-PSSC 2025), Jeju, Korea. (first author)

2025.11 *Sliding and rocking behavior of medical beds under seismic excitations.* 13th International Symposium on Steel Structures & 14th Pacific Structural Steel Conference (ISSS-PSSC 2025), Jeju, Korea. (second author)

2023.11 *Dynamic characteristics of pipeline supporting steel frames without diaphragm.* 12th International Symposium on Steel Structures (ISSS 2023), Jeju, Korea. (second author)

2023.09	**Go, H.**, & Kim, H.-J. *Cyclic behavior of single and double-angle bracing members employed in pipeline-supporting structures.* EUROSTEEL 2023, Amsterdam, the Netherlands. ce/papers, 6(3–4), 2226–2231. doi:10.1002/cepa.2293

Domestic

2026	*A simplified equivalent single-degree-of-freedom model for seismic fragility assessment of pipe-rack steel concentrically braced frames.* Annual Conference of the Computational Structural Engineering Institute of Korea. (first author, in Korean)
2025	**Go, H.**, & Kim, H.-J. *Pipeline leakage performance of chevron steel braced-frame pipe racks satisfying only general steel provisions.* Proceedings of the Annual Conference of the Korean Society of Steel Construction, 36. (in Korean) dbpia.co.kr/journal/articleDetail?nodeId=NODE12342707
2024	**Go, H.**, & Kim, H.-J. *Collapse performance of pipe-rack steel braced frames designed according to seismic design codes.* Proceedings of the Annual Conference of the Korean Society of Steel Construction, 35. (in Korean) dbpia.co.kr/journal/articleDetail?nodeId=NODE11812973
2024	*Seismic resistance of steel braced frames for outdoor pipe racks according to seismic design parameters.* Annual Conference of the Computational Structural Engineering Institute of Korea. (first author, in Korean)
2024	*Prediction of fracture lines and net-section fracture strength of bolted gusset-plate connections according to geometry and boundary conditions.* Annual Conference of the Computational Structural Engineering Institute of Korea. (second author, in Korean)
2023	*A computational program for calculating the connection strength of gusset plates.* Academic Symposium of the Computational Structural Engineering Institute of Korea. (second author, in Korean)
2023	*Evaluation of existing prediction equations for the buckling strength of column-welded gusset plates.* Annual Conference of the Computational Structural Engineering Institute of Korea. (third author, in Korean)
2022	**Go, H.**, Shin, D.-H., & Kim, H.-J. *Finite element analysis method for pipe-rack bracing members with double-angle sections.* Proceedings of the Annual Conference of the Korean Society of Steel Construction, 33(1). (in Korean) dbpia.co.kr/journal/articleDetail?nodeId=NODE11115626
2022	*Hysteretic behavior of single-angle bracing members in pipe-rack supporting frames using finite element analysis.* Annual Conference of the Korea Institute for Structural Maintenance and Inspection. (first author, in Korean)

AWARDS & HONORS

2026	**Best Presentation Award** Korean Society of Steel Construction — Annual Conference, structural division
2025	**Academic Award** Korean Society of Steel Construction — for a journal article
2025	**Grand Prize, Outstanding Graduation Thesis Competition** Architectural Institute of Korea — master's division
2022	**Best Presentation Award** Korea Institute for Structural Maintenance and Inspection — Annual Conference, structural division

CERTIFICATIONS

2024.06	**Engineer Architecture (건축기사)** National Technical Qualification, Human Resources Development Service of Korea

Updated August 2026
